

# ETL Waveguide Assemblies

ETL Systems are now offer precision made waveguide components for most microwave systems.

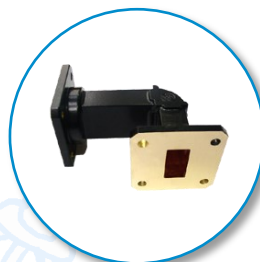

All our waveguide components are made to the highest quality standards and use International Flange styles & finishes to suit. Components are available in aluminium, brass or copper waveguide with aluminium or brass flanges fitted.

Frequency ranges up to 40 GHz, & WE-650to WR-28.

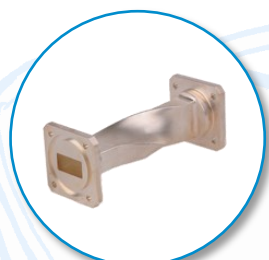

## Waveguide Straights

Made To Size, Spec & Finish with your choice of Flanges

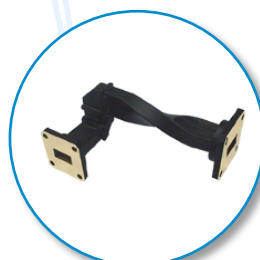

## Waveguide Bends

Can be made to E or H, cast or swept bends at various angles

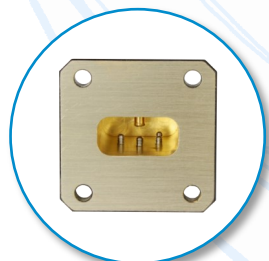

## Waveguide Twists

Choice of Twists and bends with any combination of Flanges

## Waveguide Multi-Bends

Made to specification please apply for further details

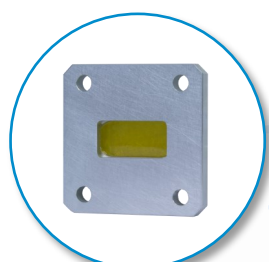

## Waveguide Adaptors

From waveguide to coax with SMA or N-Type connectors & can be supplied with superior performance over a 20% bandwidth.

## Waveguide Couplers

3 port cross guide couplers manufacture in copper, brass or aluminium with either SMA or N-Type connectors.

## Waveguide Pressure Windows

Made from aluminium or brass with Kapton windows.

### Available waveguide products

- Waveguide Bends (E&H Plane)
- Rectangular & Elliptical Waveguide
- Waveguide Twists Rigid & Flex
- Waveguide Tapers
- Bulkhead Assemblies
